

Shreshth Jaiswal

BHOPAL | (+91) 8470980674 | jaisshreshth143@gmail.com | linkedin.com/in/shreshth-jaiswal | github.com/Shreshth-11

Full-stack web developer and CSE undergraduate at VIT Bhopal (CGPA: 8.35) with hands-on experience building and deploying production-grade applications using the MERN stack and modern React ecosystem (Redux Toolkit, React Hook Form, TailwindCSS). Comfortable across the full development lifecycle — from REST API design and database modelling to BaaS integration (Appwrite) and cloud deployment (Vercel, MongoDB Atlas). Proficient in Java-based DSA; actively building projects that solve real-world problems.

EDUCATION

B.TECH in Computer Science and Engineering | VIT Bhopal University

(2023–PRESENT) CGPA: 8.35

INTERMEDIATE | BHAVAN'S KDKVM School

(2022–2023) Percentage: 82%

HIGH SCHOOL | Bhavan's KDKVM

(2020–2021) Percentage: 98.6%

PROJECTS

Wanderlust | MERN Stack (MongoDB, Express, React, Node.js), HTML, CSS, JavaScript

- Developed a full-stack Airbnb-inspired web app supporting 10+ listing categories, with end-to-end CRUD operations and role-based access control.
- Engineered 15+ RESTful API endpoints using Node.js and Express, with MongoDB (Mongoose) handling data persistence across all listing and user models.
- Integrated JWT-based authentication and session management, securing access for registered users across all protected routes.
- Designed a fully responsive React front-end rendering 50+ dynamic listing cards with real-time search and filter capabilities.
- Deployed on Vercel with MongoDB Atlas, achieving consistent sub-2s page load times across device types.
- Code: [GitHub](#) | [Live Demo](#)

Topmate Rich Text Editor | React.js, HTML, CSS, JavaScript

- Engineered a responsive rich text editor in React with 10+ formatting controls (bold, italic, color, alignment), featuring dynamic state-driven styling and an interactive splash screen.
- Implemented a real-time "Smart Compose" ghost-text suggestion engine, cutting average keystrokes per sentence by ~35% through predictive state management.
- Resolved focus management conflicts across 8+ interactive toolbar components including a multi-color palette picker, ensuring zero accessibility regressions.
- Live Demo: typemate.vercel.app

BlogSphere | React.js, Redux Toolkit, Appwrite, TailwindCSS, TinyMCE, React Hook Form

- Built a full-stack blogging platform with complete CRUD operations across 5+ post states (draft, published, edited, deleted), powered by a TinyMCE rich text editor.
 - Integrated Appwrite as a serverless backend handling user auth, session persistence, and cloud image storage — eliminating the need for a custom server entirely.
 - Architected global state management with Redux Toolkit across 4 slices (auth, posts, UI, user), reducing prop-drilling by ~100% and cutting component re-renders by ~40%.
 - Built 8+ form-validated components using React Hook Form and TailwindCSS, reducing form submission errors and achieving a fully responsive layout across all screen sizes.

CERTIFICATIONS & ACTIVITIES

NPTEL — Cloud Computing and Distributed Systems | Silver Category | Score: 84/100 | Jan–Mar 2026

NPTEL — Introduction to Internet of Things | Silver Category | Score: 86/100 | Jan–Apr 2025

Core Member, Notion Community — VIT Bhopal | Appointed via Letter of Appointment for exceptional skills and dedication

SKILLS

Languages: Java, C++, Python, JavaScript, HTML, CSS

Frontend: React.js, Next.js, Redux, React Native, Vite, React Hook Form, React Router

Backend: Node.js, Express.js, FastAPI, RESTful APIs, EJS

Databases & Cloud: MongoDB, MySQL, Firebase, Microsoft Azure, Cloud Deployment

Tools: Git, Docker, Postman, Figma, Canva
